# THE NEW **M-SERIES** CALL BOX BY CALL24™

## QUICK COMMUNICATION

Utilizing UHF or VHF 2-way radios, the wireless M-Series Call Box by CALL24™ allows for fast communication between two parties. Single push button simplicity provides instant communications capability from employees, for deliveries, or for improving guest services.

Increasing satisfaction and improving your operation's productivity at a push of a button!

## NO RECURRING FEES

With the M-Series Call Box there are no hidden costs and no on-going fees, no contracts to sign. Wireless Call Boxes at no recurring cost to you!

## POWER OPTIONS

Each M-Series Call Box includes standard rechargeable battery operation. AC StarCharge™ or Solar Suncharge™ power options available. CALL24™ can adapt the power source to your needs affordably with no hassle. Now that's power flexibility.

## ALL WEATHER PERFORMANCE

Come rain, shine, wind or snow, your M-Series Call Box from CALL24™ will provide 24-hour performance. Reliability you can count on!

## NO WIRING = FAST INSTALLATION

No phone line wiring means installation is quick and flexible. Put the M-Series Call Box anywhere you need a call station. No phone line wiring means no trenching...no mess! Now that's convenience.

## PROGRAMMABLE

The M-Series call box from CALL24™ is delivered completely programmed for seamless integration into your standard VHF or UHF two-way radio system. Up to 8 channels!

## CALL BOX ID

FleetSync®, DTMF, or 2-Tone unit identification signaling for the new M-Series Call Box is a standard feature. Simply ask for it!

## GATE OR LOCK RELEASE OPTION

Need to remotely open an entrance gate or release an electronic lock? The M-Series call box switch release option provides remote access control to service providers or employees who need access to restricted areas. Why walk all the way down to the gate when you can open it remotely from an employee's portable radio!
